

26 January 2025

**Letter of Reference**

Beh Jueen Hao Kelvin is a graduating student from the School of InfoComm Technology at Ngee Ann Polytechnic, where he is set to complete his Diploma in Information Technology in October 2024. I have known Kelvin for over two years in my capacity as both his lecturer and academic advisor.

Kelvin consistently demonstrated academic excellence, maintaining a cumulative GPA of 3.8889. He has earned a place on the Director's List consistently for semesters 1.1, 1.2 and 2.1 due to his outstanding academic achievements in that semester. He received the Module Prize for Interactive Development, Databases, and Web Application Development, awarded to the student with the most outstanding performance in each module. Alongside his full-time studies, Kelvin excelled in the Diploma-Plus program, earning the Certificate in Advanced Computing Mathematics with outstanding grades.

In addition to his studies, Kelvin actively participated in various Co-Curricular Activities. He contributed to community service through the Digital Clinic in 2022 and supported key events like the SIG Fiesta, ICT Graduation Ceremony, and Orientation Camp in 2023 as a helper. In 2024, he took on a key role in the organising team for RED Camp, honing his teamwork and event-planning skills. As a member of the Board Games Club (2023-2024), he further developed strong interpersonal and collaboration skills. These experiences highlight his contribution to the community while gaining valuable practical skills.

Kelvin is a self-motivated and responsible individual who approaches every task with dedication and determination. I strongly recommend him for the course he has applied for, and I am confident that he will continue to excel and contribute positively.

I wish him the best of luck in his application.

Yours sincerely,

---
